COURSES

Modern C++
Yandex & MIPT

📅 24 weeks

A five-level course on C++14/C++17 standard.
It includes the implementation of the basics STL containers; serialization and deserialization; smart pointers; protobuf in C++; own test runner; multithreading.

- -

Object Oriented Programming in Java
UCSanDiego & Duke University

📅 4 weeks

A course on the fundamentals of Object Oriented Programming, how to leverage the power of existing libraries, how to build graphical user interfaces, and how to use some core algorithms for searching and sorting data.

- -

Data Structures and Algorithms
UCSanDiego & HSE

📅 24 weeks

A course on algorithmic techniques such as greedy algorithms, binary search, sorting and dynamic programming to solve programming challenges.

Various data structures such as stack, queue, hash table, priority queue, binary search tree, graph and string to solve programming challenges

EDUCATION

Bachelor's degree in Computer Science
Moscow Power Engineering Institute

📅 Sept 2019 – July 2024
📍 Moscow, Russia

Undergraduate student of the programm «Applied Computed Science in Economics».

SKILLS

Java   C++14/17   Algorithms   Data Structures   SQL   Git   Unix

LANGUAGES

Russian (native) ●●●●●

English (C2) ●●●●●

ABOUT ME

Graduated from a top school with a bias in math and physics.

Read several books on Data Structures and Algorithms.

A top student in the programming class at my university.

Have been coding on high level languages since 2018.

Working as a freelancer consistently since 2017.
